

SOWTER TYPE 1285

UA-176 Push-Pull triode to balanced line 9CT:1 with Attenuator transformer

Applications

15k/185 ohm output transformer for driving a balanced ohm line from push-pull 6SN7, ECC83 etc. 50% Mumetal core for high bandwidth and dynamic range, Max output level at 50 Hz +28 dBu (19 volts). Includes primary taps for UA 176. Total dc resistance ref secondary 14 ohms. Colour coded leads. Pro Audio size K.

Mechanicals
